WOODEN EXTERIOR DOORS

BOARD TECHNOLOGY

THE KEY FEATURE OF THE "P" EXTERIOR DOOR IS THE USE OF INNOVATIVE PRODUCTION TECHNOLOGY

This technology preserves the beauty of wooden doors while eliminating most of the problems associated with traditional board technologies, such as: tearing and shifting of door coffers, warping of leaves, uneven discolouration of individual door elements, cracking and corrugation of veneers, and problems with joint fillers.

ROBUST DESIGN

The door is designed to maintain good thermal and acoustic insulation properties. Our doors feature a pine-meranti or pine-oak frame reinforced with sheet metal and a "C" shaped profile. It is up to you to decide how thick they are to be. The doors can be 72, 82 or 102 mm thick, but their design remains the same. Inside, between the sheathing made of a 7 or 12 mm thick waterproof meranti, pine or oak plywood is a truss filled with polyurethane foam.

SAFETY

All doors are protected with a multipoint lock (or two independent locks), durable and robust hinges, and a sheet metal reinforcement to provide a sense of safety and prevent burglary.

CARE FOR THE ENVIRONMENT

We use environmentally-friendly water-based varnish and wood from legal Polish forests for our doors. The waste generated during production is collected and recycled, and the production process is safe for our employees.

NEW

¹⁾ extra charge - grain direction can be vertical or horizontal (except for models with deep milling)

²⁾ extra charge - grain direction can be vertical or horizontal (except for models with deep mill work)

LACQUER

- Hydrodynamic painting with water-based paints according to the Erkado colour range or RAL opaque paints with the ADLER Protor system. Protor is a 2-component exterior door coating system with above-average resistance to weathering and wood-damaging fungi. Thanks to its high hardness and scratch resistance, the Protor system guarantees extreme durability of exterior doors for years to come.
- The wood used to make veneers differs in terms of colour, texture and consistency. Even a single tree may feature significant differences in this respect. These are the characteristic features of natural wood and may not be claimed.
- The presented colours are for illustrative purposes only and should not be used as colour samples.

Decorated with a black glass, the Glass line of timber doors perfectly complements modern buildings. Natural wood combined with a glossy black glass is a chic and timeless combination.

Finishing material:

- meranti, oak or pine

Design:

- a gasket in the leaf and the frame
- a burglary-proof rebate on the hinges side
- the external surface of the leaf made of waterproof plywood
- internal structure of the leaf in the form of a truss with a polyurethane foam filling
- the leaf tiles made of wood reinforced with sheet metal and a "C" profile

Standard set:

- thickness: 72 mm
- two independent bolt locks
- four hinges adjustable in three planes
- glazing unit REFLEX BRONZE
- an aluminium threshold with a thermal separator or a wooden threshold

Every house is fitted with interior doors. This is why thinking about doors from the perspective of their functional and practical features has long been insufficient. Underlining the best qualities in a perfectly furnished house, today they are an important component of interior design. For this reason, we create modern solutions, introduce attractive design and focus on the quality of workmanship to let you enjoy the choice of the Erkado doors.

LACQUER

- The wood used to make veneers differs in terms of colour, texture and consistency. Even a single tree may feature significant differences in this respect. These are the characteristic features of natural wood and may not be claimed.
- The presented colours are for illustrative purposes only and should not be used as colour samples.

Certificate No. ITB 831/B-2018-13

Material: oak, pine or meranti

Construction

- door leaf thickness 72 mm
- gasket in the leaf and frame
- rebated doors
- outer surface of the leaf made of 12 mm or 7 mm thick waterproof oak, pine or meranti plywood
- internal construction of the leaf in the form of a truss with polyurethane foam filling - 58 mm thick (7 mm plywood) and 48 mm thick (12 mm plywood)
- Leaf stile made of pine+oak or pine+meranti wood, reinforced with sheet metal and a "C" profile
- hinge-side anti-burglary rebate

Door frame

- glued laminated timber with oak, pine or meranti glulam 100 mm x 60 mm
- aluminium threshold with a thermal separator or wooden threshold

Finishing

- painted three times using the hydrodynamic method with water-soluble paints according to ERKADO colour range or opaque RAL paints at an extra charge except RAL 9016 (white) and RAL 7016 (anthracite) (page 99)

Dimensions

- typical according to table (page 82)
- available in non-standard sizes at no extra charge for non-standard dimensions. The extra charge only applies to the following doors: higher than 212 cm and wider than 102 cm

Standard accessories

- 2 independent bolt locks, 72 mm spacing
- four hinges adjustable in three planes
- aluminium threshold with a thermal separator or wooden threshold
- decorative stainless steel sheets in selected models
- glazing unit with black painted glass with selected models

Equipment at an extra charge

- handle
- 35/65 cylinders
- grip
- biometric lock
- door viewer
- reed switch
- electric strike - only for a multipoint lock for 1 or 2 cylinders
- multipoint lock for one or two cylinders
- wooden canopy (doors opening inwards)

Cladded wooden threshold

Heat transfer coefficient

Ud < 0,78 W/m²K

Certificate No. ITB 831/B-2018-14

Material: oak, pine or meranti

Construction

- door leaf thickness 82 mm
- gasket in the leaf and frame
- rebated doors
- outer plating made from waterproof 12 mm or 7 mm thick mahogany meranti, oak or pine plywood
- internal construction of the leaf in the form of a truss with polyurethane foam filling of 58 cm or 68 cm
- the stile of the frame made of pine+meranti or pine+oak wood, reinforced with sheet metal and a "C" profile
- hinge-side anti-burglary rebate

Door frame

- wood glued in layers with mahogany-meranti, oak or pine add-ons of 100 mm x 60 mm
- aluminium threshold with a thermal separator or wooden threshold

Finishing

- painted three times using the hydrodynamic method with water-soluble paints according to ERKADO colour range or opaque RAL paints at an extra charge except RAL 9016 (white) and RAL 7016 (anthracite) (page 99)

Dimensions

- typical according to table (page 82)

Material: meranti or oak

Construction

- door leaf thickness 102 mm
- gasket in the leaf and frame
- rebated doors
- outer plating made of 12 mm thick waterproof mahogany meranti or oak plywood
- internal construction of the leaf in the form of a truss with polyurethane foam filling of 78 mm
- the stile of the frame made of pine+meranti or pine+oak wood, reinforced with sheet metal and a "C" profile
- hinge-side anti-burglary rebate

Door frame

- wood glued in layers with mahogany-meranti or oak add-ons of 100 mm x 80 mm
- aluminium threshold with a thermal separator or wooden threshold

Finishing

- painted three times using the hydrodynamic method with water-soluble paints according to ERKADO colour range or opaque RAL paints at an extra charge except RAL 9016 (white) and RAL 7016 (anthracite) (page 99)

Dimensions

- typical according to table (page 82)
- available in non-standard sizes at no extra charge for non-standard dimensions. The extra charge only applies to the following doors: higher than 214 cm and wider than 106 cm.

Standard accessories

- multipoint lock for 1 cylinder, 92 mm spacing
- hinges adjustable in three "3D" planes
- aluminium threshold with a thermal separator or wooden threshold
- decorative stainless steel sheets in selected models

Equipment at an extra charge

- handle
- 60/65 cylinders
- grip
- biometric lock
- door viewer
- electric strike
- thermal insulation insert for threshold
- aluminium drip cap (doors opening inwards)
- reed switch

Cladded wooden threshold

heat insulating insert

Heat transfer coefficient

Ud < 0,79 W/m²K

Certificate No. ITB 831/B-2018-16

Material: meranti or oak

Construction

- door leaf thickness 82 mm
- gasket in the leaf and frame
- non-rebated doors
- outer plating made of 12 mm thick waterproof mahogany meranti or oak plywood
- internal construction of the leaf in the form of a truss with polyurethane foam filling of 58 mm
- the stile of the frame made of pine+meranti or pine+oak wood, reinforced with sheet metal and a "C" profile
- three retractable hinges
- anti-burglary bolts

Door frame

- wood glued in layers with mahogany-meranti or oak add-ons of 107 mm x 80 mm
- wooden threshold

Finishing

- painted three times using the hydrodynamic method with water-soluble paints according to ERKADO colour range or opaque RAL paints at an extra charge except RAL 9016 (white) and RAL 7016 (anthracite) (page 99)

Dimensions

- available in non-standard sizes at no extra charge for non-standard dimensions. The extra charge only applies to the following doors: higher than 214 cm and wider than 106 cm.

Standard accessories

- multipoint lock for 1 cylinder, 72 mm spacing
- three "3D" three-plane retractable hinges
- wooden threshold with thermal break
- decorative stainless steel sheets in selected models
- glazing packet with black painted glass in selected models

Equipment at an extra charge

- handle
- 55/70 cylinders
- grip
- biometric lock
- multipoint lock for 2 Euro profile cylinders
- door viewer
- electric strike
- thermal insulation insert for threshold
- aluminium drip cap (doors opening inwards)
- reed switch

Heat transfer coefficient

Ud < 0,64 W/m²K

Certificate No. ITB 831/B-2018-16

Revolving doors, a departure from the hinges on standard side fixings.

- the leaf can be made in thickness 82 mm or 102 mm
- the permissible leaf weight is up to 500 kg
- the permissible plane leaf dimensions: 150 cm x 250 cm, and for doors with glass and milling: 120 cm x 250 cm
- every door can be additionally extended by means of permanent glazed or full frame extensions
- the latest technology and hinge fixtures allow the highest quality of manufacture and use and lightweight opening, regardless of the weight of the leaf
- PIWOT DOOR prices are negotiated individually.

CO-FINANCING FOR EXTERIOR DOORS

The Priority Programme Clean Air gives the opportunity to obtain financial support for e.g. exterior doors. All ERKADO entrance door models meet the requirements of the Clean Air programme.

Below you can see the results of tests of thermal permeability of ERKADO exterior doors, as well as the RC2 certificate for burglar resistance.

TYPES OF GLAZING THAT CAN BE USED

ANTISOL

It is a solar control glass that is lightly tinted with a brown mass that reduces the transmission of solar energy. This prevents the rooms from overheating. Besides, it protects items sensitive to ultraviolet radiation.

REFLEX (stopsoil)

It is a glass with enhanced solar control. Improving the visual effect and giving a sense of privacy. This effect is achieved by applying metal oxides to one side of the glass. Those on the lighter side of the mirror can see their reflection and are visible to those on the darker side. If a person on the lighter side gets very close to the glass, they can see objects on the darker side.

ONE-WAY MIRROR (phoenician)

It is a glass pane coated with metal oxide on both sides. Typically used as a partition between rooms, one of which is darkened. Those on the lighter side of the mirror can see their reflection and are visible to those on the darker side.

MILK GLASS

It is a glass covered on one side with satin-matt varnish, thanks to which it "lets" the light in, but becomes opaque.

P4 ANTI-BURGLARY

It consists of two layers of clear glass, between which there is an anti-burglary film. Thanks to the film, the glass does not fall into small pieces when broken. Radially spreading cracks form at the point of impact. P4 glass is only available as clear glass.

SAFETY GLASS 33.1

It is the one, which minimises health hazard for people staying near glazing and in glazed rooms. Debris from broken glass, as well as fire, gases and thermal radiation - symptoms accompanying fires - can pose a danger. A glass is called "safety" if the technique of its manufacture or combination helps to limit damage from possible deformation, impact or fire.

The 33.1 marking indicated that 2 panes of 3 mm glass and one layer of a film were used. The 33.1 safety glass 33.1 belongs to the 02 glass class. It is most often used in flats, schools, offices. It provides protection against injury - it can also be used in buildings with an internal explosion hazard

SANDBLASTED GLASS

In the sandblasting process, the glass undergoes a mechanical tarnishing process using a high-pressure stream of sand.

This process makes it possible to decorate the glass with any designs from our catalogues or patterns provided by the customer. You can get the effect of a matt pattern or, conversely, a translucent pattern.

RABBET ON THE LEAF REBATE

advantages:

- tighter fit of the leaf to the frame
- full coverage of striker plates

- S - width in the clearance of door frame (mm)
- So - opening width in the wall (mm)
- Ss - door leaf width (mm)
- Sz - total door width (mm)
- Ho - height of the opening in the wall (mm)

- H - height in the clearance of the door frame (mm)
- Hs - door leaf height (mm)
- Hz - total door height (mm)
- Hpa - aluminium threshold height (mm)
- Hpd - wooden threshold height (mm)

EXTRA CHARGES FOR NON-STANDARD ORDERS

EXTERIOR DOORS

EXTRA CHARGES FOR NON-STANDARD ORDERS	
Item	Description
1.	No extra charge for doors narrower than 102 cm and lower than 212 cm (thickness: 72 mm and 82 mm)
2	Extra charge for wider doors:
a)	Wider doors up to a total width of 106 cm (door thickness: 72 mm and 82 mm)
b)	Wider doors up to a total width of 110 cm (door thickness: 102 mm)
c)	Doors with an overall width of 107 cm to 111 cm (door thickness: 72 mm and 82 mm)
d)	Doors of overall width from 111 cm to 115 cm (door thickness: 102 mm)
e)	Extra charge for door size "100" (112 x 208.2/210 – door thickness: 72 mm and 82 mm), (116x210.2/212 – door thickness: 102 mm)
3	Extra charge for higher door (without fanlight):
a)	Ranging from 212 to 215 cm + 15% of a typical door
b)	Ranging from 215 to 224 cm + 30% of a typical door
c)	Ranging from 224 to 250 cm + 40% of a typical door
4	Side extension for an overall door width of up to 150cm:
a)	Opening, with glazing + 75% of single door value
b)	Opening, without glazing + 70% of single door value
c)	Fixed leaf imitation without glazing + 50% of single door value
d)	Fixed glazed leaf imitation + 60% of single door value
e)	Fixed in frame – mahogany-meranti (regardless of the overall width)
f)	Fixed in frame – oak (regardless of the overall width)
g)	Fixed in frame – pine (regardless of the overall width)
5	Side extension with overall door width from 151cm to 170cm:
a)	Opening, with glazing + 95% of single door value
b)	Opening, without glazing + 90% of single door value
c)	Fixed glazed leaf imitation + 85% of single door value
d)	Fixed leaf imitation without glazing + 80% of single door value
e)	Fixed in frame – mahogany-meranti (regardless of the overall width)
f)	Fixed in frame – oak (regardless of the overall width)
g)	Fixed in frame – pine (regardless of the overall width)
6	Extra charge for double doors from 171 to 196cm width is + 110% of single door value
7	Frame fixed extensions and fanlight
a)	Fixed in frame – mahogany-meranti
b)	Fixed in frame – oak (regardless of the overall width)
c)	Fixed in frame – pine (regardless of the overall width)
d)	Fixed imitation door leaf up to total door height of 250cm + 50% of the door value
8	EXTRA CHARGES – COLOUR
a)	Colour from the RAL range (single door), except Ral 9016 (white) and Ral 7016 (anthracite)
b)	Double-colour doors
9	Extra charge for changing the glazing
a)	Fixed extra charge for changing the glazing e.g. one-way mirror, milk glass, sandblasted glass, P4, REFLEX GRAFIT, black REFLEX, ANTISOL black
10	Frame thickness: for 10 mm/mb (pine, oak, meranti)
11	Widening of the frame to the wall width in the form of a tunnel:
a)	material mahogany-meranti per cm adjustable mahogany-meranti headband
b)	material oak for every cm adjustable band oak
c)	material pine for every cm adjustable band pine
12	Covering bands 10 mm x 60 mm set per side
a)	mahogany-meranti
b)	oak
c)	pine
13	Quarter rounds 10 mm x 25 mm set for one side (set)
a)	mahogany – meranti
b)	oak
c)	pine
14	Aluminium drip cap for doors opening to the inside
a)	Wooden drip cap for inward opening doors
15	Fixed glazed extension with glass flush with the leaf (only available for non-rebated doors)

striker plate at an extra charge

DOOR CLOSER

Retractable DOOR CLOSER with a STOP function and a restrictor

ARM DOOR CLOSER

ELECTRIC DOOR STRIKE

ELECTRIC DOOR STRIKE is available only with a multipoint lock for 1 or 2 inserts

DOOR CARE PRODUCT

Regular maintenance of wooden windows and doors is important for long-term durability of their surface. To keep the costs as low as possible, ADLER has developed a maintenance kit that is simple and effective to use. No brush, no sandpaper needed, just a care kit. The micro cracks and micro pores of the varnish layer will be closed, thus significantly prolonging the durability of water-based varnishes and lacquers.

ELECTRONIC DOOR OPENING SYSTEM

(additional LED lighting at an extra charge)

SET 1

pull handle R6R9-515, length from 80 cm to 180 cm + controller R6-BBX-CU + cable BBX-120-GU + power supply, cable grommet

SET 2

controller R6-BBX-CU + cable BBX-120-GU + power supply, cable grommet

SET 3

pull handle R6QE-515/R6QM-515/R6TM-515, length from 80 cm to 180 cm + controller R6-BBX-CU + cable BBX-120-GU + power supply, cable grommet

DOOR OPENING

When choosing a door with a grip, you can choose from three ways of it opening:

- unlocking it with a key
- opening it with a "day-night" function on an electric strikes or with a key
- opening with a button or a key.

For an extra charge, the grips are available with a button "door opening function with an electric strike or a motor"

version 1

- The price includes:
- button in the pull handle
 - electric strike
 - power supply unit
 - remote trigger

version 2

- The price includes:
- button in the pull handle
 - motor for GU lock
 - power supply unit
 - cable groomet
